

Dr Radhakrishnan Delhibabu
Visiting Scientist at KBSG,
Informatik 5, RWTH Aachen University Kreisfreie Stadt Aachen Area,
Germany

Radhakrishnan Delhibabu

Dr Radhakrishnan Delhibabu has a PhD degree in Computer Science and Engineering from RWTH Aachen, Aachen, Germany. He is working theoretical computer science and now more concentration on application domain. He has over 7 years of experience in Research and Teaching in various Application and Core of Theatrical Computer Science course, especially Fundamentals courses, Automata, Discrete Mathematics, AI, Logic, DB and Cognitive modeling. The primary goal his my research is to discover the computational principles underlying the brain's remarkable ability to learn, process and store information, and to apply this knowledge to the task of building adaptive robotic systems and brain-computer interfaces (BCIs).

At ST•AUBLI, Bayreuth, Germany, he has worked in VAL3-Programmer and interaction with service robot. In Dreamware Infotech, Chennai, India, he has worked as a Senior Programmer (.NET, Java). As a Project Management Professional (PMP) with over 3 years of experience in Research and Development, he has experience in managing and leading software development teams in the successful implementation and deployment of various software applications and infrastructure initiatives.

Dr Radhakrishnan was awarded Erasmus Mundus fellowship at RWTH Aachen University in the duration of July 2010 to May 2013. He got research fellowship sponsored by SSN College of Engineering (HCL software groups) and he achieved top India competitive exam for higher studies like, GATE (92%) and JEST (93rd in the all India rank).

Currently he is in the active review board member in APIN Springer journal, KBS Elsevier journal and others.
