**Sotirios G. Maipas**

Sotirios Maipas received an M.A. from the Physics Department of Aristotle University of Thessaloniki, an M.A. in Environmental Health from the Medical School of the National and Kapodistrian University of Athens, and a Ph.D. in fractal analysis of breast cancer cells from the Athens Medical School. Currently (2020), he is an MBA Candidate at the Hellenic Open University. His main academic interests cover various topics of environmental health and sustainability, including the dissemination of the relevant knowledge, the corporate sustainability, and the impacts of the business sector on the environment.

He is a Research Associate at the Master Program “Environment and Health. Management of Environmental Health Effects” of the Medical School of Athens, and he teaches the following topics: “Environmental Education and Communication”, “Sunscreen Products and their Environmental Impact”, “Innovation in Environmental Health Management”, “The Environmental Impacts of Tourism” , “The Environmental Health Concept in Arts” and “Methodology of Manuscript Preparation”. He is also a novelist, and the administrator of a Greek scientific, cultural and educative website named: “onpodium.gr – The art of sharing knowledge”. Additionally, he is a member of the scientific committee “STEAM” (Science, Technology, Engineering, Arts and Mathematics) of the Greek Open Technologies Alliance.
