

**4th International
Conference on Education
(EDU2023)**

4-7 December 2023

The future of education: inclusive and
interdisciplinary responses to global
challenges

<https://coming.gr/events-2023/>

Communication Institute of Greece

This conference provides a forum to share knowledge, consider how to adapt to current challenges and co-develop a sustainable path for a better future. This year's conference themes will focus on promoting effective communication, access and equity, empathy, knowledge sharing and exchange, building resilience and devising possible solutions that will take educational practices into the future, despite the uncertainty that our learners face in this changing world.
